FIRST SEMESTER 2015-2016
Course Handout Part II

Date: 03-08-2015

In addition to Part-I (General Handout for all courses appended to the timetable) this portion gives further specific details regarding the course.

Course No. : **BITS F372**
Course Title : **Data Communications and Networks**
Instructor-in-charge : **Sainath Bitragunta**

1. **Scope and Objective of the course**

A communication network is one of the fastest growing areas today. The course introduces the concepts and mechanisms underlying the modern telecommunication systems and networks. The course is designed in such a way that the course is accessible to students without any special technical background in this area. The OSI model is used as a framework to introduce different protocols and standards. The course will prepare the student for advanced courses in the areas: telecommunication switching systems, computer networks, and internetworking etc.
