FIRST SEMESTER 2015 -2016

Course Handout (Part-II)

Date: 03/08/2015

In addition to part I (General handout for all courses appended to the timetable) this portion gives further details regarding the course.

Course Number : PHY F111
Course Title : Mechanics Oscillations and Waves
Instructor-in-Charge : **KUSUM LATA**
Team of Instructors : **R R Mishra, D D Pant**, Debashis Bandyopadhyay, Madhukar Mishra, Manjuladevi V, Rakesh Choubisa, Rishikesh Vaidya and Srijata Dey,

Scope & Objective: Mechanics Oscillations and Waves is a foundation course in Physics that is mandatory for all the first degree students.

Course Description: The first half of the course deals with the applications of Newton's laws to the systems of particles and the study of linear and rotational motion using polar coordinates. The second half deals with the physics of non-inertial reference frames, oscillatory motion, coupled oscillations, and waves.

Text Book:

1. **An introduction to mechanics**, by Kleppner and Kolenkow, Tata McGraw-Hill Indian edition 1999.
2. **Vibrations and waves**, by A.P. French, CBS Publishers and Distributors, Inc., first Indian edition 1987.

Reference Book:

R1: Physics, Vol.1, by Halliday, Resnick, & Krane, 5th Edition, John Wiley & Sons, Inc., 2002
R2: The Physics of Waves and Oscillations by N K Bajaj, Tata McGraw-Hill 1984.

Course Plan:

Lecture Number	Learning Objectives	Topics to be covered	Chapter/Section
<i>Topics from Text Book 1 (Kleppner and Kolenkow)</i>			
1-3 (3)	Foundations of Newtonian mechanics	Applications of Newton's laws, everyday forces of Physics	2.1-2.5
4-6 (3)	Momentum	Dynamics of system of particles, conservation of momentum, impulse, flow of mass, momentum transport	3.1 – 3.6
7 (1)	Work and energy	Eqn. Of motion in one dimension and several dimensions, work energy theorem and application	4.1-4.6
8-10 (3)	Work and energy (contd.)	Potential energy & conservative systems, energy curve, small oscillations in bound system, non conservative forces, power	4.7-4.13
11-12 (2)	Angular momentum	Angular momentum, torque, fixed axis rotation	6.1 – 6.4

Please Consider Your Environmental Responsibilities
Do Not Print Unless Necessary

13-15 (3)	Angular momentum (contd.)	Dynamics of pure rotation, physical pendulum, motion involving both translation and rotation	6.5 - 6.7
16-18 (3)	Noninertial systems	Galilean transformations, uniformly accelerating systems, principle of equivalence	8.1 – 8.4
19- 21(3)	Noninertial systems [contd.]	Physics in a rotating frame, the coriolis force	8.5
Topics from Text Book 2 (A.P. French)			
22-24 (3)	Simple harmonic motion (SHM)	The basic mass-spring system, solving SHM equation using complex exponentials, examples of SHM, the decay of free vibrations, effect of very large damping	Ch. 3 pp: 41-53, 62-70
25-27 (3)	Forced oscillator and resonance	Undamped oscillator with harmonic forcing, forced oscillator with damping	Ch. 4 pp. 78-95
28-29 (2)	Forced oscillator and resonance	Power absorbed by a driven oscillator, resonance	Ch.4 pp: 96-101
30-34 (5)	Coupled Oscillations	Normal modes, normal frequencies and forced oscillations of two coupled oscillators, normal modes and their properties for N coupled oscillators	Ch.5 pp: 121-127 129-151
35-37 (3)	Normal modes of continuous systems	The free oscillations of stretched strings, normal modes of a stretched string, forced oscillations of a stretched string	Ch.6 pp: 161-170
38-41 (4)	Progressive waves	Progressive waves in one dimension, wave speeds in specific media, superposition, motion of wave pulses of constant shape, phase and group velocity	Ch.7 pp: 201-216 223-234
42-44(3)	Progressive waves [contd.]	Energy and its transportation by a wave	Ch.7 pp: 237-243

Evaluation Scheme:

EC No.	Evaluation Component	Duration	Weightage (%)	Date, Time & Venue	Nature of Component
1	Tutorials/Quiz		25	**	Closed Book
2	Midterm Test	90 mins.	30	8/10 10:00 - 11:30 AM	Closed Book
3	Comprehensive Examination	3 hours.	45	8/12 AN	Closed/Open Book

** To be announced in tutorial class

Chamber Consultation Hour: To be announced in the class.

Notices: Notices and solutions will be displayed only on **PHYSICS/FDIII** notice board.

Make-up Policy: **Very strict:** Make up for tests will be given only to genuine cases. No makeup for tutorials/quizzes.

Instructor-in-Charge (PHY F111)
